com.novetta.clavin.resolver.multipart

The image displays 15 UML class diagrams for the `com.novetta.clavin` library, organized into five groups of three diagrams each. Each diagram uses a distinct color scheme to represent a different package or module.

- MatchedLocation** (Yellow): Includes methods `getMatchCount`, `getMatches`, `equals`, `getMatchSpecMatch`, `isFullySpecified`, `getMatch`, `hashCode`, and `toString`.
- ResolvedMultipartLocation** (Green): Includes methods `getCountry`, `getState`, `equals`, `hashCode`, `toString`, and `getCity`.
- DefaultScorer** (Blue): Includes methods `getScore`, `score`, and `parameters`.
- MultipartLocationName** (Green): Includes methods `getCity`, `getState`, `hashCode`, `equals`, `getCountry`, and `toString`.
- MultipartLocationResolverTest** (Blue): Includes methods `setUpClass`, `tearDownClass`, `parameters`, `verifyCity`, and `verifyLocation`.
- SearchResult** (Green): Includes methods `getBestLocation` and `score`.
- Scorer** (Green): A simple class with no methods shown.
- com.novetta.clavin.extractor** (Orange): Includes `AdaptNlpExtractor` (methods: `extractLocationNames`) and `Entity` (methods: `getText`, `getType`, `setConfidence`, `setEndPos`, `setType`, `setConfidence`, `setEndPos`, `setText`).
- com.novetta.clavin.index** (Orange): Includes `IndexDirectoryBuilder` (methods: `main`, `getOptions`, `buildIndex`, `printHelp`) and `IndexGeoName` (methods: `loadNormalFormNames`, `logUnresolved`, `resolveAncestry`, `resolveUnresolved`).
- LocationOccurrence** (Green): Includes methods `getText`, `hashCode`, `equals`, and `toString`.
- TextBody** (Green): Includes methods `getText`, `setText`, and `toString`.
- ApacheExtractor** (Pink): Includes methods `extractLocationNames` and `testNullInput`.
- IndexDirectoryBuilder** (Orange): Includes methods `main`, `getOptions`, `buildIndex`, and `printHelp`.
- BinarySimilarity** (Purple): Includes methods `idf`, `tf`, and `testTF`.
- WhitespaceLowerCaseTokenizer** (Cyan): Includes methods `normalize` and `testTF`.
- WhitespaceLowerCaseAnalyzer** (Purple): A simple class with no methods shown.
- com.novetta.clavin.util** (Orange): Includes `DamerauLevenshteinTest` (methods: `testDamerauLevenshteinDistance`, `testDamerauLevenshteinDistance`) and `Null` (methods: `hashCode`, `equals`, `toString`).
- ListUtilsTest** (Blue): Includes methods `testListUtils` and `testListUtils`.
- DamerauLevenshtein** (Green): Includes methods `testDamerauLevenshteinDistance`, `testDamerauLevenshteinDistance`, and `testDamerauLevenshteinDistance`.
- InfiniteCharArray** (Green): Includes methods `get` and `remainder`.
- ListUtils** (Blue): Includes methods `chunkSize` and `testListUtils`.
- TextUtils** (Grey): Includes methods `fileToString` and `testListUtils`.
- GeoParser** (Yellow): Includes methods `parse` and `testListUtils`.
- AllTestsSuite** (Blue): A simple class with no methods shown.
